Q121

ORD: At a recent meeting of the EPA Clean Air Scientific Advisory Committee (CASAC), multiple members of CASAC expressed doubt that they had the scientific experience to manage reviewing the science on particulate matter, which includes divergent scientific fields from epidemiology, to toxicology to data science to instrumentation.

- a. Do you still believe that this CASAC has the requisite expertise to provide you with advice on particulate matter?

Deliberative Process / Ex. 5

Deliberative Process / Ex. 5

- b. Epidemiology is a key subject for assessing the health impacts of particulate matter such as early death and cardiovascular illness, yet not a single epidemiologist is on CASAC. How can CASAC adequately assess the science on particulate and health, when its members do not have expertise in key fields like epidemiology and when there is no particulate matter review panel?

Deliberative Process / Ex. 5

- c. Has CASAC consulted with outside experts on PM and ozone standards? If so, with whom?

Carper 42 OMS/OCSP/ OECA: I recently learned that samples of GenX, an unregulated, PFOA-like contaminant used to make nonstick cookware and other products, are sitting in refrigerators near the Lower Cape Fear River in Fayetteville, North Carolina because EPA's lab in Athens, GA has been shut down.

- a. Please confirm whether this is true.

Deliberative Process / Ex. 5

- b. If so, please provide a list of similar situations where EPA's ability to monitor and test for water contamination has been affected by the government shutdown.
